

SERGIO ROMERO

FRONT-END DEVELOPER

Colombia (Remote-ready) [✉ sergiodrp70@gmail.com](mailto:sergiodrp70@gmail.com) [🌐 Web Site](#) [🔄 GitHub](#) [🌐 LinkedIn](#)

PROFESSIONAL OBJECTIVE

Frontend Developer with experience building web and mobile applications for real-world products and startup environments. I am motivated to join a dedicated and innovative team where I can contribute to the development of high-quality user interfaces, apply best practices, and continue growing professionally. My goal is to strengthen my skills in modern frontend technologies while delivering reliable, scalable, and user-focused solutions.

EXPERIENCE

2025

July - December

FRONT-END DEVELOPER - REACT NATIVE

🌐 Spanish

📄 Page

Tidelit Unity SAS - Colombian company

- Developed core features for the MVP of a music streaming mobile app using React Native, React, and TypeScript.
- Implemented UI designs from Figma across 40+ screens, ensuring consistency and accessibility.
- Integrated REST APIs and validated critical user flows.
- Collaborated with backend and design teams under Agile/Scrum methodology.
- Improved navigation and user experience before public launch.

Tech: React Native, TypeScript, HTML, CSS, TailwindCSS, Figma, Git, Scrum

2025

January - June

FULL STACK WEB DEVELOPER

🌐 English

📄 Page

Rad Consultans - EE. UU StartUp

- Contributed to the full-stack development of a web and mobile application for automotive repair services.
- Built and maintained frontend interfaces and backend features.
- Developed and deployed serverless backend logic using Firebase Functions (v2).
- Integrated third-party services for messaging and email delivery (Twilio, SendGrid, Resend).
- Fixed bugs and improved overall product stability and functionality.
- Collaborated remotely with cross-functional teams following Agile/Scrum practices.

Tech: Flutter (Dart), JavaScript, Firebase, Firebase Functions V2, Google Cloud, Twilio, SendGrid, Resend, Git, Scrum, Slack

PROJECTS

Ecom Shop

[🌐 Spanish](#)[🔗 Demo](#)[📄 Code](#)

Front-end - API - UX/UI Designer | E-commerce Web App (React + TypeScript) | 2025

- Front-end development of an e-commerce web application that queries products obtained from the Platzi Fake Store API, using Axios to obtain the requested information and Zod to create data type schemas.
- TailwindCSS, for the attractive display and listing by category of the different products queried by the API, with the option to preview for more product details, with interactive buttons to add or remove from either favorites or the shopping cart.
- Use of React with Typescript and implementation of Zustand for the global management of the application's states and actions, dedicating sections to their respective pages, favorites, and cart.
- Dynamic, attractive, real-time shopping cart, allowing products to be added and removed, with operations for quantity, prices, subtotal, shipping costs, taxes (VAT - 16%), and the total purchase amount, with a button to continue to checkout.

Expense planner

[🌐 Spanish](#)[🔗 Demo](#)[📄 Code](#)

Front-end - React - UX/UI Designer | Expense Planner Web App (React + TypeScript) | 2025

- Front-end development of a web application for financial expense control using React and Typescript, utilizing Context API and useReducer for global state and action management.
- It allows you to define an initial budget that will display the available amount and the amount spent, graphically representing the percentage progressively, also showing filters for recorded expenses.
- It includes adding, modifying, deleting, and clearing recorded expenses, with dynamic validations in the registration form and a button to restart the application once the expense plan is complete, for continuous use.
- Implementation of dynamic styles adaptable to different devices with TailwindCSS, as well as state storage with localStorage to preserve information in case of restarting or closing the web application.

EDUCATION

- **Systems Engineering** **2021 - 2025**
Universidad Simón Bolívar
- **Multimedia Design and Integration Technician** **2019 - 2020**
National Learning Service - SENA

SKILLS & TOOLS

- **Frontend:** React, TypeScript, JavaScript, React Native, TailwindCSS
- **Backend & Cloud:** Firebase, Cloud Functions, Node.js
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Tools:** Git, GitHub, Figma
- **Methodologies:** Agile, Scrum, Kanban
